Job Title: CHP/Cogen Field Technician

Location: Upton Massachusetts

Organization: Co-Energy America

andrewpink@bostonvw.com

Job Responsibilities:
Co-Energy America is a leading developer of packaged combined heat and power systems, specializing in the design, manufacture, installation and maintenance of 60kW to 1MW units.

Since 1998 we have designed and installed over 60 cogeneration units at schools, hotels, apartment buildings, assisted living facilities and other commercial properties totaling nearly 11MW of continuous power throughout New England.

Upton, MA – Co-Energy America, a well established combined heat and power (CHP) company, is seeking applicants to join our field team. Position is geared toward seniors or recent graduates of technical training schools. Applicant should have automotive training and an interest in gaining mechanical and electrical experience.

As a field technician, you will be trained on routine service and repair of CHP systems, and develop troubleshooting skills to diagnose and repair disabled units. You will be responsible for performing preventative maintenance on the CHP units and preparing daily reports on work performed and communicating clearly with customers and office staff.

Job Requirement:

- Knowledge of gas engines
- Ability to understand and follow operations and maintenance manuals
- Ability to read schematics
- Ability to communicate clearly and effectively
- A valid driver's license and clean driving record
- Self-motivated and able to work both independently and on a team
- Energetic and positive attitude, and willingness to learn

Training will be provided, and Co-Energy's highly experienced team is always available for guidance. Tech will work under the supervision of the Service Manager. Field Technicians are provided with a company vehicle, health insurance and $15-20/Hr depending on background.
