

Job Title: Electrical Project Engineer/Designer

Location: Peabody, MA

Organization: Weston & Sampson

Weston & Samson is a full service environmental and infrastructure consulting firm with nearly 400 professionals; all committed to excellence in their chosen fields.

Job Responsibilities:

- Conduct engineering and design for both new and retrofit projects for a variety of facility types within the private, public and municipal sectors including pump stations, treatment plants, public works, sports, aquatics and educational facilities.
- Design will include field investigation of existing facilities, energy related services, shop drawing review, generation of reports and project specifications and production of contract documents.
- Responsibilities will include coordinating with multi-disciplinary personnel located in both local and regional offices, sub-consultants, utility companies, equipment vendors and clients.

Job Requirement:

- Proactive and results oriented
- Demonstrate leadership skills.
- Good interpersonal and communication skills; using Microsoft Word and Excel.
- Strong problem-solving and analytical skills.
- Proficient using AutoCAD 2010 and above.
- Able to travel locally in New England for project meetings
- A minimum of 4 years of experience working in a professional engineering firm
- EIT or PE a plus
- Technical degree in relevant field
