

Job Title: HSS - Biomedical Equipment Technician 1

Location: Cambridge, MA

Organization: ABM

Job Responsibilities:

- Under the direction and supervision of the account manager or regional director, the qualified person will perform a variety of repairs and scheduled maintenance inspections on various medical devices, using common hand tools and test equipment.
- Training in a specialized modality is a plus.
- The candidate will be responsible for performing incoming inspections and associated data entry for all work and activities.
- The individual may be occasionally dispatched to satellite facilities belonging to the hospital and subject to minor travel.
- Perform scheduled maintenance, safety inspections and repairs to varying types of patient care equipment.
- Follow safe practices relating to infection control, hazardous materials and mechanical loads and industry compliance standards.
- Enter work order data into the service database.
- Report any device problems that may impact patient care or patient safety to the supervisor for corrective action.

Job Requirements:

- Associates degree related to biomedical equipment technology, electronics, military training equivalent or BMET experience.
- Computer science skills are a plus.
